PROFILE

Electrical Engineering student at UNSW with 3 years of Tier 1 construction experience across major infrastructure and industrial projects with BESIX Watpac. Experienced in services coordination, commissioning documentation, energisation support, BMS-integrated systems and live functional testing. Combines strong technical site experience with prior business development experience managing a \$9.6M regional portfolio.

EDUCATION

University of New South Wales

February 2023 – Present

Bachelor of Engineering (Electrical) (Honours)

WAM: 70

- Relevant coursework: Power Systems, Electrical Machines, Control Systems, Signals & Systems, Digital Signal Processing, Electronics Design, Data Structures & Algorithms.
- Overall Winner – First Year Engineering Design Course

PROFESSIONAL EXPERIENCE

BESIX Watpac

May 2023 – Present

Services Engineer Cadet (Full-Time)

Woolworths Sydney Chilled & Fresh Distribution Centre | \$430M | Commissioning Phase

- Supported formal energisation sign-off for VSDs serving chiller, condenser and evaporator packages following pre-commissioning inspections of live LV electrical equipment.
- Reviewed and signed off commissioning plans, ITPs, and ITCs across refrigeration plant, MSSBs, VSDs and HV generators prior to energisation.
- Witnessed and supported documentation for the full 11kV HV switchboard commissioning sequence, from installation through energisation and downstream transformer feed.
- Coordinating hydraulics, refuelling, vertical transport, security and weighbridge services packages, including contractor programmes, design documentation, technical submissions and commissioning closeout.
- Supporting the Base Services commissioning manager in day-to-day commissioning coordination, including tracking commissioning readiness, FAT closeout, pre-commissioning activities and cold commissioning sequencing.

Sydney Metro City & Southwest – Barangaroo Station | \$350M | Handover Phase

- Delivered the full commissioning lifecycle for the Portion 6 dewatering system, including design coordination, installation oversight, controls commissioning and client acceptance demonstration to Sydney Metro.
- Verified BMS-integrated dewatering controls, including duty/standby pump alternation, emergency backup pump operation, level trigger setpoints, fault alarms and switchover logic.
- Authored the dewatering system O&M manual, accepted by Sydney Metro with minor comments.
- Managed DALI lighting controls system handover to Sydney Metro, including functional verification and client sign-off.
- Managed O&M manual review, comment closeout and handover documentation across all services packages in collaboration with Sydney Metro.

The Engineering & Design Institute London

June 2023 – July 2023

Engineering Internship

- Analysed operational and infrastructure challenges within the London Underground network, with a focus on Canada Water Station, and presented findings to programme stakeholders.

Tyremax Pty Ltd

July 2020 – September 2023

Business Development Manager

- Promoted to Business Development Manager within 10 months after starting in warehouse/internal sales role.
- Managed the North-West NSW region, achieving \$9.6M revenue against a \$7M target, exceeding budget by 37%.
- Used sales data and customer analysis to identify market growth opportunities, manage key accounts and support regional sales strategy.

TECHNICAL SKILLS

Electrical/Services HV/LV distribution, VSDs, MSSBs, generators, BMS-integrated controls, DALI lighting controls, commissioning documentation, ITP/ITC review, O&M manuals.

Software & Tools Aconex, Bluebeam, MATLAB, C, Python, Verilog, VHDL.

LEADERSHIP & COMMUNITY

School Captain – Glenmore Park High | Lions Youth of the Year Regional Finalist | Volunteer Mathematics Tutor | U12 Cricket Coach – Glenmore Park CC
